Batuhan BATTAL

Software Engineer ▪ Aspiring AI Engineer.
Email: batubattal@gmail.com ▪ Mobile: (+49) 15510983172
Address: Cham, Germany ▪ Date of Birth: 18.01.2001, Turkey
LinkedIn: https://www.linkedin.com/in/batu-battal/

Motivated Software Engineering graduate with hands-on experience in software development, currently pursuing a master's degree in Artificial Intelligence for Smart Sensors and Actuators at Technische Hochschule Deggendorf. With a solid engineering foundation gained through application development, academic research, and technical publications, and passionate about bridging core software engineering principles with intelligent systems and modern machine learning techniques, I am seeking to advance a career specializing in Artificial Intelligence, primarily focusing on smart sensor technologies, data-driven modeling, and intelligent software solutions.

EDUCATION

M.Eng. AI for Smart Sensors and Actuators — **October 2026 – Present**
Deggendorf Institute of Technology — *Deggendorf, Germany*

- Coursework includes: Artificial Intelligence, Machine Learning (neuronal networks), Embedded Control for Smart Sensors and Actuators, Sensor Technology, System Networking, Data Processing (Cloud Computing, Big Data), System Design

B.Sc. Software Engineering — **September 2020 – December 2024**
Istanbul Beykent University — *Istanbul, Turkey*

- Focus on: OOP, Data Structures, Algorithms, Database Management, Software Engineering Principles, Software Architecture and Design Patterns, Mobile Application Development, Software Project Management, Agile Methodologies
- Bachelor Thesis: Fake News Detection Article
- Final Grade: 2.63/ 4 (equivalent to German grade: 2.05)

WORK EXPERIENCE

Software Engineer Intern (SAP) — **July 2023 – September 2023**
NTT Data Business Solutions — *Istanbul, Turkey*

- Customized SAP Cloud for Customer (C4C) UI using SAP Cloud Applications Studio.
- Implemented backend business logic (ABAP/ ABSL) based on technical specs.
- Conducted testing, debugging, and UI validation in an Agile environment.

Software Engineer Intern (Mobile Developer) — **August 2024 – September 2024**
Kant Software — *Istanbul, Turkey*

- Developed responsive UI components and integrated RESTful APIs.
- Participated in full-lifecycle mobile and web application development.
- Performed unit testing, debugging, and code optimization.

TECHNICAL SKILLS & CORE COMPETENCIES

- **Programming Languages:** Python, C++, Dart, SQL, ABAP/ ABSL
- **AI & Machine Learning:** Machine Learning Fundamentals, Supervised Learning, Model Evaluation, Data Preprocessing (TF-IDF, Feature Selection)
- **Frameworks & Developer Tools:** Flutter, Scikit-learn, Git, RESTful APIs, SAP Cloud Applications Studio, VS Code
- **Documentation & Analytical Tools:** MS Office Suite, LaTeX, Markdown, Jupyter Notebook
- **Soft Skills:** Analytical and critical thinking, problem-solving, high adaptability to new technologies, collaborative teamwork, effective cross-functional communication

PROJECTS

Fake News Detection with Machine Learning | Bachelor's Thesis & Published Research
Python, Machine Learning (Random Forest, SVM, Naive Bayes), Data Mining (KDD), TF-IDF, Scikit-Learn

- Build an automated machine learning framework to detect fake news on social media datasets.
- Applied KDD preprocessing steps (data cleaning, TF-IDF vectorization), evaluated 7 supervised algorithms with/without PCA, and validated performance via 5-fold cross-validation.
- Published in *Celal Bayar University Journal of Science* (2024).

Sports Taboo Mobile Game | Cross-Platform Mobile Application
Dart, Flutter, REST APIs, Git

- Designed an interactive, category-based word game featuring dynamic databases for football and basketball.
- Implemented flexible UI components, custom game logic algorithms, and efficient state management.

LANGUAGES

- **English:** Fluent; **German:** Elementary; **Turkish:** Native

CERTIFICATIONS & TRAININGS

- **Machine Learning & Data Science Fundamentals**. Coursera, 2024.
- **Agile Software Development & Scrum Principles**. Enterprise Training, 2023.

ACCOMPLISHMENTS

- **Academic Publication:** Co-authored a peer-reviewed research paper on Machine Learning and Fake News Detection published in *Celal Bayar University Journal of Science* (2024).
- **Mobile Application Deployment:** Successfully developed, published, and managed mobile applications on official app platforms.

INTERESTS

- Technical Interests: Developing machine learning applications; affinity for new technologies and enthusiasm for artificial intelligence, smart sensors & actuators, embedded AI systems.
- Personal Interests: Cinema & film analysis, fitness & strength training, amateur football player, playing basketball.

Cham, 24.09.2026
